MacLellan
Polymers to Industry

Specifically, no tallow-based stearates, casein, gelatin, collagen, shellac, lanolin, or other known animal derivatives are used.

BSE / TSE Statement

Based on supplier declarations and internal material reviews, the rubber sheeting products supplied by MacLellan Rubber Ltd:

- Do not contain materials of animal origin
- Do not use animal-derived processing aids
- Do not contain substances listed as Specified Risk Materials (SRMs)

VP0- ADI-Free, BSE/TSE, and EUDR Compliance Statement Last Updated – 09 January 2026

Accordingly, these products present no risk of Bovine Spongiform Encephalopathy (BSE) or Transmissible Spongiform Encephalopathy (TSE) as defined by relevant EU and UK legislation and guidance.

Disclaimer

This statement is based on supplier documentation and internal technical review as of the effective date below. It does not constitute formal Halal, Kosher, allergen, GMO, or third-party sustainability certification unless explicitly stated. This declaration applies only to the products listed within the defined scope.

Signed

Simon Winfield

Director
